Volunteer: Robert Manalo

Dear Sir or Madam

We hereby confirm that Robert Manalo is currently enrolled in our new Volunteering program. Robert will mainly implement new features & maintain our web application (mostly TypeScript & React). Furthermore, he later has the option to extend his responsibilities by working on our hybrid mobile application (React Native with TypeScript) or our Node.JS-Backend (TypeScript).

About our company

We are a newly founded Austrian startup and our business model focuses on low-priced & personalized Corporate-Social-Responsibility [CSR]. Thus, we create a mobile application which enables enterprises, governments, NGOs, politicians, communes or any other organization to sponsor people (e.g. rebates, products, cash, vouchers, ...) to do something good for humanity (e.g. gathering trash, helping out in retirement homes, ...). You can find more information on our website: <https://wavect.io>

Hopefully your university accepts this kind of confirmation as we are truly happy to welcome such an engaged student in our organization. Thank you in advance.

Yours faithfully

Riedl Kevin
CEO, CoFounder
